- „Bypass“ function switches off the amplifier when the phone is used by a person with normal hearing
- Tone control (high/low sounds)
- Ideal for the hard-of-hearing or in noisy environments
- Requires a 9 V battery (not included)

Notes

Notes

Why choose amplicomms products

„ETS 300381 Preferred“ for corded phones

amplicomms devices meet the highest European standards for hearing aid compatibility. The integrated induction coil reduces distortions by more than 80% and doubles the receiver volume in hearing aids as compared to other phones for the hearing impaired.

M4/T4 and M3/T3

Digital mobile phones with excellent hearing aid compatibility are rated M4/T4.

Good hearing aid compatibility is rated M3/T3.

GGT-Seal

With this seal the Society for Gerontechnology (Gesellschaft für Gerontotechnik) certifies the excellent user friendliness of our products. Test criteria include functionality, price-performance ratio and special functions for the visually impaired and the hearing impaired.

ECO*mode*

Reduced radiation between mobile unit and base station.

DEKRA-Seal

This seal confirms that our company‘s service quality is monitored constantly due to our participation in DEKRA „WebVoting“.

Energy-Saving

The power supplies included in the delivery fulfill the ecodesign requirements of the European Union
(Directive 2005/32/EC). This means that power consumption is markedly lower, both during operation and while inactive, than in older power supply models.

Service

amplicomms provides excellent service including a 24-month warranty for all products.
Technical questions are answered by our Helpline[1)] UK 0844 800 6503

* Using a UK landline, at the time of going to print: calls cost 6p for connection charge and then 5p a minute. Mobile costs may vary.
** Network-dependent
